

Nurse Practitioner Information Fact (2)

Question: Are you looking for an experienced health care provider - one who spends time with you and offers clinical expertise with a holistic approach?

Answer: Look no further than your local nurse practitioner. More and more people are choosing nurse practitioners (or NPs) as their primary, acute and/or specialty health care provider.

NPs partner with their patients - assisting them in making better lifestyle and health care decisions. NPs practice in community, hospitals, long term care and more. NPs are different from other health care providers - they focus on the whole person when treating specific health problems, and they educate their patients on the effects those problems will have on them, their loved ones and their communities.

Find out for yourself how an NP can be your partner in health. Contact the [PEI Nurse Practitioner Association](#) to find an NP in your area. You'll be glad you did.
