

### **Nurse Practitioner Information Fact (3)**

Question: Do you know where to turn when your child is sick? When you're planning a family? For health education? When your parents need care?

Answer: Turn to a nurse practitioner. An NP diagnoses, treats, prescribes and manages medications and treatments and provides a wide range of preventive and acute health care services to individuals of all ages.

If you're already seeing an NP, please take a moment during National NP Week to say thanks. Contact the [PEI Nurse Practitioner Association](#) to find an NP in your area. You'll be glad you did.
