

Nurse Practitioner Information Fact (4)

Question: Does your health care provider examine, diagnose, prescribe, treat, counsel and educate – all in a way that is caring and dependable for you and your family?

Answer: NPs do all this and more! NPs are dedicated professionals who provide high-quality, cost-effective, personalized health care to diverse populations in rural and urban settings.

If you're already seeing an NP, please take a moment during National NP Week to say thanks.

Contact the [PEI Nurse Practitioner Association](#) to find an NP in your area. You'll be glad you did.
