

## Where can I find Nurse Practitioners?

Currently, most Nurse Practitioners work in Primary Care but more and more are beginning to appear in specialized community and clinic settings, like Geriatrics, Mental Health, Oncology, and Long-Term Care.

You can also find a list of Nurse Practitioners on the Association of Registered Nurses of Prince Edward Island (ARNPEI) website under [NP Directory](#).

On the ARNPEI NP directory you will find a list of all Nurse Practitioners who are licensed to practice on PEI. It will also include where they work as well as their work phone number.
